WORK EXPERIENCE

Tech Corp

Software Engineer

Jan 2022 - Present

Bengaluru

- **Agentic Pipeline:** Developed a multi-agent system for automated PR reviews.
- **Performance:** Reduced build times by **40%** through caching optimizations.

StartUp Inc

Junior Developer

Jun 2020 - Dec 2021

Remote

- **Feature Delivery:** Implemented the core payment gateway integration.
- **Collaboration:** Worked with UX teams to refine the onboarding flow.

PROJECTS

Spring Code Forger

- **Agentic Codegen:** Built a multi-agent system that ingests **Swagger/OpenAPI** specs and auto-generates production-ready **Spring Boot** CRUD scaffolding.
- **LLM Orchestration:** Designed an agent-per-layer pipeline using **LangChain + Claude**, cutting boilerplate authoring time by **~70%**.

TestForge

- **Test Automation:** Built a multi-agent workflow that generates **Selenium/Playwright** automation tests from plain-English user stories.
- **Agentic Pipeline:** Coordinated planner → writer → validator agents for self-healing test generation.

EDUCATION

Top University | B.Tech in Computer Science | 2020

- GPA: 3.8/4.0
- Awarded Best Capstone Project 2020

CERTIFICATIONS, SKILLS & INTERESTS

- **Languages:** Python, Java, TypeScript, Go.
- **Frameworks:** React, Spring Boot, FastAPI, PyTorch.
- **Tools:** Docker, Kubernetes, AWS, Git.
- **Concepts:** Distributed Systems, LLMs, CI/CD.
- **Interests:** Open Source, Agentic Workflows, Chess.
